Two sum

```
#sum of two numbers
a=int(input("enter a number:"))
b=int(input("enter a number:"))
sum=a+b
print("sum of two numbers:", sum )
```

Remove duplicate

```
#remove duplicates
list1=[]
list2=[]
for i in list1:
    if i not in list 2:
        list2.append(i)
        list1.remove(i)
    else:
        print(i)
        print(list1)
```
